Site View and Lunch Location

Pumped storage power plant OTTENSTEIN

Ottenstein is in the heart of the so called “Waldviertel”, part of Lower Austria. So we will have a nice trip through a very beautiful landscape.

The pumped storage power plant Ottenstein lies at the foot of the 69 m high vault barrier Ottenstein (1957). The four Francis turbines installed in the powerhouse produce 12,000 kilowatts each. Depending on the damming height, 84 to 100 cubic meters of water per second are required for this purpose, which are then discharged into the immediately adjacent Dobra reservoir. The Kampsee Ottenstein, which extends to Zwettl Abbey, has a surface area of 4.3 km² and a storage volume of 73 million cubic meters. The tour in the 69-meter-high dam is very impressing.

The lunch-location “Hotel Restaurant Ottenstein” is nearby and hopefully you’ll enjoy the local specialities.
After we have strengthened, the journey continues through the Wachau (a famous wine region along the river Danube) to “Dürnstein”.

There we will have the opportunity to walk around and visit the historical place.

Dürnstein Abbey: [https://www.stift-duernstein.at/en/](https://www.stift-duernstein.at/en/)

Further Information - as there are lunch, schedule and Dürnstein-Programme, will follow soon.
Monday, 21th October 2019
